

FIRST STATE ROBOTICS

Making Miracles Happen One Student at a Time

September 2011

Dear Potential Sponsor,

We are helping to raise money for a local area Robotics Team, MOE, "Miracles of Engineering". We are hosting a Wine & Beer Tasting at The Buzz Ware Center in Arden, Delaware. At this event there will also be a Silent Auction, Raffles, and a 50/50. A donation from your business would help tremendously and be very much appreciated. Your business name will be proudly displayed on a banner to thank all of our sponsors.

Our team consists of students from 16 different high schools in Delaware, Pennsylvania and Maryland who participate on Team 365 "The Miracle Workerz" (www.moe365.org). The profits from this fundraiser will be used to help the high school students who participate in our robotics program. This program is part of FIRST (For Inspiration and Recognition of Science and Technology: www.usfirst.org) founded by Dean Kamen. Involvement in this FIRST program exposes young people to the world of engineering and inspires them to pursue intellectual excellence. Talented professionals mentor these students through the process of solving complex and challenging questions in a fun and exciting atmosphere. *These mentors are all volunteers who spend countless hours to help these students succeed!*

The students spend one night a week in the fall learning the basics of building a robot. They begin in January and spend four days per week, for six weeks, building a robot to compete in robotics competitions in the late winter/early spring culminating with a Championship in St. Louis.

These students are our future engineers and scientists. We thank you for helping us to fulfill our student's goals. All donations are tax-deductible through our parent organization, First State Robotics, Inc., a 501(c) (3) corporation (Tax ID: 20-0613092).

Sincerely,

Craig Gross
