FIRST STATE ROBOTICS

Making Miracles Happen ... One Student at a Time

January 2014

Dear Business Leader,

FIRST Team 365 "The Miracle Workerz" (www.moe365.org) is a local area FIRST Robotics Team. Our team consists of students from 16 different high schools in Delaware, Pennsylvania and Maryland. Also known as MOE 365 ("Miracles of Engineering"), the students spend one night a week in the fall learning the basics of engineering and building a robot. Starting in January, they spend four days per week, for six weeks, building a robot to compete in robotics competitions in the late winter/early spring culminating with the World Championship in St. Louis.

A donation from your business would be used to help the high school students who participate in our robotics program. Your sponsorship would help tremendously and be very much appreciated.

FIRST (For Inspiration and Recognition of Science and Technology: www.usfirst.org) was founded in 1989 by Dean Kamen to inspire young people's interest and participation in science and technology. Dean Kamen is an inventor, entrepreneur, and tireless advocate for science and technology. His passion and determination to help young people discover the excitement and rewards of science and technology are the cornerstones of FIRST.

Involvement in the FIRST program exposes young people to the world of engineering and inspires them to pursue intellectual excellence. Talented professionals mentor these students through the process of solving complex and challenging questions in a fun and exciting atmosphere. *These mentors are all volunteers who spend countless hours to help these students succeed!*

These students are our future engineers and scientists. Please consider helping us fulfill our student's goals. All donations are tax-deductible through our parent organization, First State Robotics, Inc., a 501(c) (3) corporation (Tax ID: 20-0613092).

GO MOE !!!

Sincerely,
Craig Gross , Boosterz President
